Source: Analysis of UC application and enrollment data.

* An individual student can apply to UC multiple times across the five-year period we display. Therefore, we used unduplicated totals within each academic year, consolidating a student’s multiple applications into one outcome. We also calculated unduplicated totals in this manner across the five-year period, which we display in the last row. As a result, this five-year total will not equal the sum of each academic year’s totals.
